

Interschutz 2026

01.-06. Juni 2026 in Hannover

WHERE GAS SAFETY MEETS SMART MANAGEMENT RTR solution overview

1. SST Range Devices

Reliable lone worker protection

The SST1 and SST1E provide up to three years of protection without sensor replacement, eliminating downtime. The SST1 and SST1E series delivers fast, accurate advanced sensors. O₂ up to 20% or Impres

2. Compliance Kiosk

Safe! Where it happens

The Compliance Kiosk decentralises safety by enabling instant device check-ins, on-site verification, and incident logging in real-time locations. Digital records for management, including on-site and simulated

3. SST Dock

Rapid calibrations, lower cost

The SST Dock performs full calibrations on-site and can compare built-in tests. Site use is reduced by up to 50% by automating the process and eliminating

4. RTR Site

Efficient Control

RTR captures compliance and reports data to the Compliance Kiosk, SST Dock and desktop. Device List App, with dashboards showing OELs, alarms and device health. Features for reports, audits, and fast, ready reporting

5. RTR Main Office

Safe! Where it happens

RTR Main Office centralises all data for the dashboard for quick analysis of compliance, reports and device status. This enables coordinated responses, faster audits, and more efficient field solution

INTERSCHUTZ

Weltleitmesse für Rettungsdienst, Brand- und Katastrophenschutz

Personenschutz ist für Rettungskräfte
ein zentrales Thema. Nur wer
sich selbst schützt, kann
anderen helfen.

Portable Gaswarngeräte

Portable Gaswarngeräte, welche die Rettungskraft an sich trägt, können Gefahren erkennen und so schnell warnen.

Ein- oder Mehrgas-Detektoren

An der Messe wurden diese vorgestellt und den Messebesuchern live vor Ort demonstriert.
