

LEAK DETECTION SYSTEM

LEAK-MASTER® PRO 2

Micro-leak detection system for packages based on CO₂. LEAK-MASTER® PRO 2 features non-destructive detection of the smallest leaks without the need for costly Helium. Evacuated chamber with the help of a compressed air operated Venturi nozzle (optionally also with electric vacuum pump). Status indication by LED lighting of chamber.

Benefits

- visual indication of status via LED lighting
- short testing period by minimal response time
- quick product change
- for flexible and rigid packs
- especially durable and low in maintenance
- standardised test processes - user independent
- operator friendly – data and process parameter entry by means of integrated keyboard or remote personal computer (e.g. MS-Excel®)
- easy-to-use intuitive system – no special skills required
- convenient data administration and evaluation for customer oriented quality documentation
- various chamber sizes (see back side)
- easy installation and start-up
- easy to clean splash-proof stainless steel and acrylic glass cabinet / housing
- remote transmission of results via Ethernet

Options

- Barcode Reader with IP-protection for simple and quick user/product selection
- leak simulation kit for testing and defining acceptable leak rates
- optionally with electrical vacuum pump as an alternative to operation with compressed air for model LM 2.1 and LM 2.2 – not retrofittable (please indicate prior to order)
