# TOUCHLBM 15"/7"/5,7"/3,5" color TFT - functions

## General functions

- max. **1024 screens** available, objects are free placeable in 90° steps rotatable
- color mapping via fore-/background color, transparency modus
- predefined function for numeric value input (NUM BLOCK) and for **text input** via qwerty keyboard
- automatic **dim function** (256 steps) of background illumination with free time edit control
- automatic **screen saver function** with 8 predefined screen savers (e.g. DIA modus) and free time edit control
- automatic screen changing with free time edit control
- switchable **button sound**, tone output and tone pitch via script controllable
- switchable **screen fading** at screen changing
- viewing angle: 0° or 180° (6'00/12'00) switchable via software -> 180° mounting possible, site angle 70° (all sites)
- all objects in 90° steps rotatable, vertical mounting possible
- screen selection via password defendable, **password protection: per screen (8 levels)**
- max. 512 backgrounds with a color bit depth of 262144 colors (5,7"+7" TOUCHLBM) and 16Mio colors (10"+15" TOUCHLBM)
- a lot of predefined fonts, every font is invertible/scalable
- project download via Ethernet by FTP possible

## Touch

- free creation/position of **touch buttons**; buttons can highlighted with pictures or animated pictures.
- repeating key, types of key: On-Off, changing, button. "invisible" button definable
- status normal + pressed + disabled per button with different visual indicator via change in value switchable
- **multifunction**, e.g. value assignment to data point and onscreen changing, value assignment to data point (LON variable) or internal memory cell, value assignment data point to data point or from internal memory cell to data point, integrated computation- and comparing functions.
- **bargraph** with color changing and touch function

## LON/BACnet/Modbus

- creation of LON network variables, BACnet objects, Modbus objects
- **LON SNVT** variables and **UNVT** (Uservar) useable.
- Import function of external XIF files for automatic creation of network variables with automatic reversal of the direction. XIF Export function.

## Scheduling

- **scheduler** with logic function and automatic timer, max. 64 scheduler à 64 switching times à 64 functions, switching time with day/week function, switching time + functions assignment are changeable online on the touch-panel!

## Calendar

- **calendar function** year 1980-2099, 64 calendar (assigned to scheduler) range: single days, week, weekend, automatic repeating, calendar are changeable online on the touch-panel!

## Alarming

- 32 alarms with each 16 terms

## Trending

- **trend log**, 16 samplings à 16 samples (max 16MB/sampling), optional on SD card
- diagram-/trend-show functions on touch-panel with history, 3 predefined diagram types, up to 16 values in one diagram indicated

## Graphic

- graphics scalable, transparency mode, import function of graphics in **file format bmp, png, jpg, gif, ico, svg** with automatic scaling
- **animation function** for graphical object animation with event control
- function for **event controlled graphic state change**
- modification of background picture/skin during operation
- use of True Type Fonts (static text elements with all available fonts in Windows)

## Script

- **script function** for free programmability, event- or time controlled (periodical) script implementation, implementation local (in actual screen) or global
- basic commands: IF..THEN..ELSE, LOOP, reading memory/writing/copying, sound output, screen changing, set illumination
- LON commands: service PIN send message, LON send/poll datapoint, new script functions to send/receive explicit messages
- BACnet commands: ReadProperty, WriteProperty

## Other

- variable use of NTP time server via IP with automatic time correction
- offline menu for parametrization of standard parameters, touch calibration
- slide operating function
- options: - Remote Access via VNC
